Factsheet | Figures as of 29-02-2024

RobecoSAM Euro SDG Credits C EUR

RobecoSAM Euro SDG Credits is an actively managed fund and provides a diversified exposure to the Euro investment grade credit market. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long term capital growth. The fund advances the UN Sustainable Development Goals (SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. The portfolio is built on the basis of the eligible investment universe and the relevant SDGs using an internally developed framework about which more information can be obtained via the website www.robeco.com/si. The fund can take some off-benchmark positioning in emerging markets, covered bonds and a limited exposure to high yield bonds.

Performance

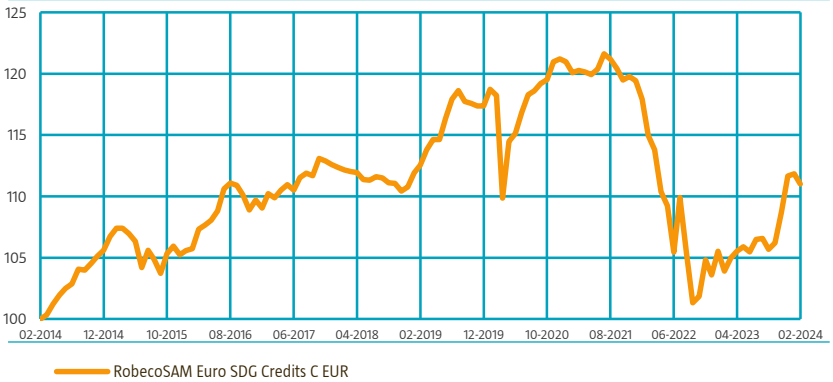
Indexed value (until 29-02-2024) - Source: Robeco



Performance

Based on transaction prices, the fund's return was -0.75%.
The portfolio outperformed its benchmark index, gross of fees. The benchmark return was negative, as underlying government bond yields sold off, which was only partially offset by a tightening in credit spreads. Specifically, the Euro Aggregate Corporate Index moved down 9 basis points to 120 basis points above government bonds, while the 10-year German Bund yield rose 24 basis points, reaching 2.41%. Performance attribution is split into beta positioning and issuer selection, in line with our investment process. Our small beta overweight position had a positive impact during the month, as index spreads tightened, while we maintained a beta position above one throughout the period. The majority of the outperformance stemmed from issuer selection in February. Several of our higher-beta positions, including Macquarie, Permanent TSB, Eurobank, mBank and Athora, among others, saw further compression, contributing to this month's outperformance.

Market development

In February, the trend of spread tightening persisted alongside another robust month for risk assets on a broader scale. Several equity indices, including the S&P 500, reached record highs, partially credited to the sustained enthusiasm surrounding advancements in AI. Global economic data remained strong, reinforcing the narrative of a soft landing, as employment and consumer spending stayed resilient. On the contrary, stubbornly high inflation in the US, with January's core CPI at +0.4%, exceeding expectations, led investors to adjust rate cut expectations, pushing out the anticipated timing of the first rate cut to June. Consequently, sovereign bond yields increased further. US regional banks continued to grapple with challenges, notably New York Community Bancorp's reported loss due to raised loan loss expectations in commercial real estate. Finally, new issue activity continued to be strong and broadened away from financials, with high demand sustaining low concessions and pricing deals competitively against secondary curves. This solid technical backdrop, driven by robust fund flows and yield buyers, caused downward pressure on credit spreads across the board.

Expectation of fund manager

We have reached the end of one of the sharpest hiking cycles in modern history. Economies in Europe and the US have so far moved through it without being derailed. Markets have declared victory and fully embraced a soft landing. However, we remain cautious, as it is likely we have not fully seen the impact of the tightening cycle. Central banks are gradually pivoting, but rate cuts are still a few months away it seems. The market overall has moved a lot and in some parts valuations are outright rich. We believe selection will be key, not all companies are equal, so it is important to remain vigilant and invest in those companies where risk return is properly balanced. For investment grade portfolios, we continue to see value in banks that still trade cheaper on average. Europe has further room to tighten compared to the US credit market. Given the rally that we have witnessed, we are currently targeting our betas for investment grade portfolios to just above 1. We see this as a conservative positioning for this category. Given the improved technical picture, we deem it too early to go underweight risk. And this leaves ample room to increase risk if volatility returns.

Sector allocation

In our portfolio management, we not only factor in weights, but also spreads and durations (DTS). On that basis, we are overweight in financials and underweight in non-financials. The overweight in financials is mainly located in the banking sector, while the real estate sector is an underweight.

Sector allocation		Deviation index
Financials	45.7%	2.3%
Industrials	25.7%	-22.8%
Covered	11.5%	11.5%
Utilities	5.5%	-2.6%
Agencies	5.1%	5.1%
Treasuries	2.7%	2.7%
Local Authorities	0.6%	0.6%
Cash and other instruments	3.2%	3.2%

Duration allocation

The intention of the fund is to have a duration position that is neutral against its benchmark.

Duration allocation		Deviation index
Euro	4.4	0.0

Rating allocation

We have no clear preference for specific rating buckets. Our positioning over the different buckets is therefore the result of beta positioning, sector themes and issuer selection.

Rating allocation		Deviation index
AAA	13.7%	13.4%
AA	9.7%	1.3%
A	24.7%	-16.1%
BAA	43.0%	-7.5%
BA	5.5%	5.5%
NR	0.2%	0.2%
Cash and other instruments	3.2%	3.2%

Subordination allocation

In the banking sector, we like subordinated debt including Tier-1 and Tier-2 capital. The absolute weight in Additional Tier-1 bank CoCos is currently down to 1%. For some European corporates there is an attractive spread pickup available by moving from senior debt into corporate hybrids.

Subordination type allocation		Deviation index
Senior	82.8%	-8.3%
Tier 2	8.9%	2.9%
Hybrid	3.7%	0.8%
Tier 1	1.4%	1.4%
Cash and other instruments	3.2%	3.2%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

Sustainability is incorporated in the investment process by the means of a target universe, exclusions, ESG integration, and a minimum allocation to ESG-labeled bonds. The fund solely invests in credits issued by companies with a positive or neutral impact on the SDGs. The impact of issuers on the SDGs is determined by applying Robeco's internally developed three-step SDG Framework. The outcome is a quantified contribution expressed as an SDG score, considering both the contribution to the SDGs (positive, neutral or negative) and the extent of this contribution (high, medium or low). In addition, the fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. ESG factors are integrated in the bottom-up security analysis to assess the impact of financially material ESG risk on the issuer's fundamental credit quality. Furthermore, the fund invests at least 10% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where a credit issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion.
The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures.
The index used for all sustainability visuals is based on Bloomberg Euro Aggregate: Corporates.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.
Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

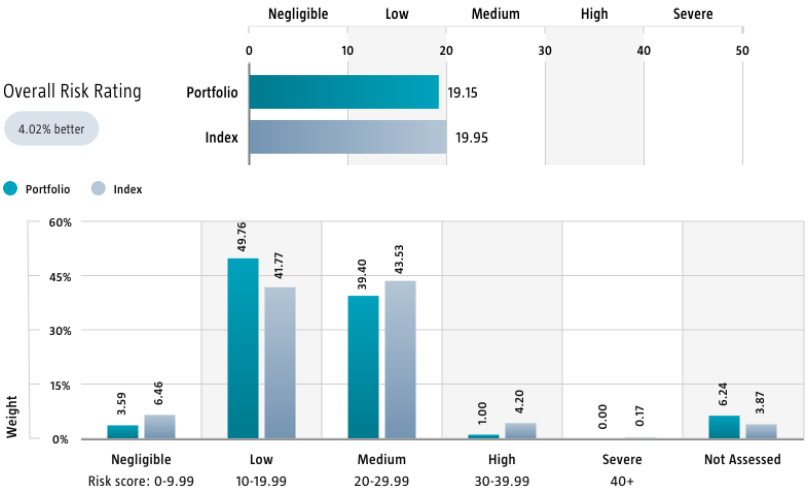
Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.



Source: Copyright ©2024 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

	Portfolio weight	Index weight
Green Bonds	18.48%	12.38%
Social Bonds	1.23%	1.16%
Sustainability Bonds	0.14%	0.64%
Sustainability-Linked Bonds	0.14%	2.49%

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	12.49%	23	87
Environmental	5.03%	9	41
Social	2.07%	6	19
Governance	2.12%	5	14
Sustainable Development Goals	1.28%	3	9
Voting Related	3.64%	4	4
Enhanced	0.00%	0	0

Investment policy

RobecoSAM Euro SDG Credits is an actively managed fund and provides a diversified exposure to the Euro investment grade credit market. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long term capital growth. The fund advances the UN Sustainable Development Goals (SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. The portfolio is built on the basis of the eligible investment universe and the relevant SDGs using an internally developed framework about which more information can be obtained via the website www.robeco.com/si. The fund can take some off-benchmark positioning in emerging markets, covered bonds and a limited exposure to high yield bonds.
The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund advances the UN Sustainable Development Goals (SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. The fund applies sustainability indicators, including but not limited to normative, activity-based and region-based exclusions.
The majority of bonds selected will be components of the Benchmark, but bonds outside the Benchmark may be selected too. The fund can deviate substantially from the weightings of the Benchmark. The fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the applications of limits (on currencies and issuers) to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the sustainable objective of the fund.

Fund manager's CV

Jan Willem de Moor is Portfolio Manager Investment Grade in the Credit team. Prior to joining Robeco in 2005, he worked at the Dutch Medical professionals' pension fund as an Equity Portfolio Manager and at SNS Asset Management as an Equity Portfolio Manager. Jan Willem has been active in the industry since 1994. He holds a Master's in Economics from Tilburg University. Peter Kwaak is Portfolio Manager Investment Grade in the Credit team. Prior to joining Robeco in 2005, he was Portfolio Manager Credits at Aegon Asset Management for three years and at NIB Capital for two years. Peter has been active in the industry since 1998. He holds a Master's in Economics from Erasmus University Rotterdam and he is a CFA® charterholder.

Team info

The RobecoSAM Euro SDG Credits fundis managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts (of which four financials analysts). The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by dedicated quantitative researchers and fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Important information

Risk factors you should consider before investing: Markets: The value of investments and the income from them can go down as well as up and you may get back less than the amount invested. Exchange Rates: Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment. Country : Less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk. The risks outlined might be particularly relevant to this fund and should always be read in conjunction with all warnings and comments given in the prospectus and KIID for the fund. Other important information: The fund constitutes a recognised scheme under section 264 of the Financial Services and Markets Act. Nothing herein constitutes investment, legal, tax or other advice and is not to be relied upon in making an investment or other decision. No recommendation is made, positive or otherwise, regarding individual securities mentioned. You should seek professional advice before making any investment decisions. This is not an invitation to subscribe for shares in the Fund and is by way of information only. Subscriptions will only be received and shares issued on the basis of the current Prospectus, relevant Key Investor Information Document (KIID) and other supplementary information for the Fund. These can be obtained free of charge from Northern Trust Global Serviced Limited, 50 Bank Street, Canary Wharf, London E14 5NT or from our website www.robeco.com. The ongoing charges mentioned in this publication express the operational costs including management fee, service fee, taxe d'abonnement, depositary fee and bank charges and is the one stated in the fund's latest annual report at closing date. Robeco Institutional Asset Management B.V., Rotterdam (Trade Register no. 24123167) is registered with the Netherlands Authority for the Financial Markets in Amsterdam and subject to limited regulation in the UK by the Financial Conduct Authority. Details about the extent of our regulation by the Financial Conduct Authority are available from us on request. Unless otherwise stated, performances are i) net of fees based on transaction prices and ii) with dividends reinvested.
